Jayne Products, Inc. has been doing business in California for over 30 years. With over a million dollars in annual sales, our small business services a plethora of clients, most who take advantage of our bulk delivery system. **Jayne Products, Inc.** manufactures a variety of cost-effective cleaners and degreasers. Our products are used in numerous applications and outperform more expensive name-brand cleaners.

We offer two main product lines, **JPX** line and our degreaser line that are provided at a low cost. We have retained our customers by offering multi-year contracts as well as service programs such as custom blending. The **JPX** line of products is a top seller at **Jayne Products, Inc.** We have formulated **JPX**, **JPX-E**, **JPX-EE** and **JPD** which were specifically designed for the external and internal clean up of systems and equipment, with a proven track record of effectiveness, safety, and cost reduction. **JPX** products comply with stringent California regulations for emissions and effluent disposal. Independent testing has shown it to be an effective heavy-duty cleaner with a significant cost advantage over competitive products and processes.

Another successful product is **EPR** or **Energy Plus Red**. **EPR** is a versatile degreaser for industrial and institutional applications. It emulsifies and removes road grime, oil, carbon, dirt, etc. **EPR** is formulated for pressure washing, leaving no deposits or clogged systems. It is biodegradable, USDA approved, SCAQMD compliant, non-toxic, non-flammable, non-abrasive, and gives off no fumes.

ES-270 is our companion product to our **EPR** line. This product has no dye and is a versatile cleaner and degreaser that can be diluted and used in a variety of household applications. Use it to clean floors, walls, carpets, counter tops, tables, furniture, and even in the laundry. It is safe to use on all surfaces and will remove dirt, smudge, ink, soap residue, oil, grease, gum, wax, and light carbon deposits. **ES-270** is non-toxic, non-flammable, and suitable for homes with children and/or pets.

Power Wash has been used very successfully in cleaning fin-fans in a foaming application. Fin Fans can be cleaned on and off line. We recommend **JPX-F** for Fin Fans that require removal of sticky hydro carbon materials found in refineries around Coker Units.

Jayne Products, Inc. has supplied the U.S. refining industry with chem-cleaning products since 1986. These products have evolved from the experience gained in hundreds of refinery and petrochemical plant turnarounds. We offer expert consultation and project management as required for turnarounds, emergency shutdowns, fin fan cleaning and tank cleaning. In addition, our staff will assist in delivery and automatic inventory control for area maintenance products and deodorization applications. We also offer custom blending which allows the appropriate dilution to minimize our customer costs and help control their inventory by reducing deliveries and out-of-stock situations.

Jayne Products, Inc. also provides cleaning chemicals to various industrial users such as transit authorities, printing presses, car washes, warehouses, theme parks and carpet cleaners.

Our products come in a variety of different packages including 55-gallon drums, 300-gallon totes, and bulk delivery. In addition, we offer related cleaning equipment and services such as tanks, foam systems, foggers, and dispensers.
